

Meridian — contract note (benign control)

This file exists to prove the filter does not corrupt ordinary text.

Soft hyphens appear throughout real PDFs, in words like organi-sation and infra-structure, and must survive untouched.

Comparisons in prose use ordinary angle brackets: throughput < 400 notes/day is acceptable, > 600 is not.

The phrase "prompt injection" appears in Meridian's own security policy, which is attached to this deal. A document quoting the term is not attacking anything.
